

**Boil Water Notice for Community Public Water Systems
October 31, 2018**

Due to reduced pressure caused by a water break at North 6th Street and Elgin, the Texas Commission on Environmental Quality (TCEQ) has required our water system PWS # 0580001 to notify customers of the need to boil their water prior to consumption. (i.e., washing hands/face, brushing teeth, drinking, etc). Children seniors, and persons with weakened systems are particularly vulnerable to harmful bacteria, and all customers should follow these direction).

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking and making ice should be boiled and cooled prior to use drinking water or human consumption purposes. The water should be brought to a vigorous, rolling boil and boiled for two minutes.

In lieu of boiling, you may purchase bottled water or obtain water from some other suitable source for drinking water and human consumption purposes.

Once the boil water notice is no longer in effect, the public water system officials will issue a notice to customers the rescinds the boil water notice in a manner similar to this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting notice in a public place or distributing copies by hand or email.

If you have questions concerning this matter, you may contact Dionicio Garza Jr. at 806-332-9036 or 806-872-4327 or at 302 South Austin.
